## Customization opportunities

- **Individual document types and categories**  
Create individual document types and categories in accordance with the companies requirements!  
Develop an integrated documentation system!
- **Customized core data**  
The content of the system's comboboxes can be modified or expanded at will.
- **Custom fields**  
With the TriDoc system, you can define up to 30 completely individual fields.
- **Approval workflows**  
Define individual approval processes for your various document types! Enter which colleagues have to approve the given document types and in which order.
- **Access control**  
Both data level and function authorization can be customized.
- **Own language version**  
In addition to the 10 languages of our product you may create also further custom languages.
